I know of no other book that teaches you how to calculate over 30 ballistics variables using the easy formulas in the manual. The formulas are in an easy to understand format (for the lay man) so that most anyone can use these formulas to calculate all the variables for your individual customized round or design and patent your own cartridge. 3.) This book also supplies the reader with the ability to simply turn to the page that has the cartridges that they are interested in and see the 'best of best' data for a .308 versus a 30-06 or a 7.62 x 39 versus a .223 (for example) when loaded with their best performance options. 4.)
